

HYLYT*EFA® BATH OIL/COAT CONDITIONER

DVM

Grooming Rinse

NDC No.: 47203-411-07, 47203-411-32

Active Ingredient(s): Sodium lactate as a natural moisturizing factor, safflower oil (linoleic acid), lanolin oil, mineral oil, polyvinyl pyrrolidone and fragrance in a hydrating medium.

Indications: Restores the skin and coat condition of dogs and cats following medicated washing. The natural moisturizing factor binds moisture to keratin. It aids in the control of flaking and scaling by normalizing keratinization.

Dosage and Administration: Shake well before using.

Use HYLYT® Coat Conditioner as a spray or rinse to restore the proper moisture balance to the skin immediately following medicated or routine shampooing.

As a spray: Use full strength or dilute one (1) capful to one-half (½) gallon of warm water. Mist the entire haircoat, rub in well and groom with a brush. For areas of dry skin, part the hair so that the spray makes direct contact with the skin. Rub in well and groom with a brush. Be sure to push down on the sprayer with sufficient pressure to obtain a fine mist. May use once a day or as directed by a veterinarian.

As a rinse: Add one (1) capful to one-half (½) gallon of warm water, mix thoroughly and pour the mixture evenly over the haircoat. Gently rub into the haircoat, then towel dry.

Caution(s): For professional veterinary use only.

Presentation: Available in 7 fl. oz. and 30 fl. oz. sprayers.

* Essential Fatty Acids
